Installing locale.ini v1.26 on DOS or Linux

Fantasy Entertainment Booths

This document describes how to install the new locale.ini file, located on the floppy disk provided, onto Portrait Studio and Sketch Express booth computers.

Locale.ini is a configuration file that configures the vend program software to accept currency and provides several pricing options. The new locale.ini file allows you to configure booths to accept the Euro coins.

To restore your original local.ini file and currency settings, follow these directions and select the Restore function instead of Install.

Use the System Configuration Utility to configure your machine to use the Euro 1 country code.

Upgrade Parts List

This upgrade includes the following parts:

- Euro 1 Upgrade floppy disk
- 48.000764 *Loading locale.ini v1.26 on DOS or Linux Fantasy Entertainment Booths* (this document)

Installing the Locale.ini File in Linux Booths

Start with the computer in normal rotation (waiting for a customer to insert money).

Note: Commands are case sensitive.

To install the locale.ini using the Linux Command Line, follow these steps:

1. Press the **Q** key to quit the Ad Rotation and access the Booth Menu.
2. Press and hold the **CTRL** and **ALT** keys then press and release the **F4** key. Release all keys. The system displays the following login prompt:
3. Type **vend** at the login prompt and press the **Enter** key.
4. Type **fotofant** at the password prompt and press the **Enter** key. The system displays the following messages:

```
PAM_pwdb[344]: (login) session opened for user vend by LOG-  
IN(uid=0)
```

```
Last login: Wed Sep 5 17:00:04 on tty4
```

```
Kickstart-Ver.1.3 Built at Fantasy Ent. Red Hat Linux Tue Aug  
28 09:30:44 EDT 20
```

```
01
```

```
[root@localhost /vend]#
```

5. Type **mnt /mnt/floppy** at the command prompt.

Note: There is a space between mnt and /mnt/floppy.

Product:

Portrait Studio and
Sketch Express

Operating System:

Linux and DOS
