

Service Bulletin

Installing Seat Brackets for the Sit-down Booths

Some of the benches in the sit-down booths are sliding forward, causing the customers discomfort while using the booths. This Service bulletin applies to all Sit-down booths except the Skyline and Ladybug booths.

Required Tools

The following tools are suggested to upgrade the printer:

- Phillips head screw driver

Suggested Tools

The following tools are suggested to upgrade the printer:

- Drill to make a pilot hole (optional)
- Tape measure
- Flashlight

Upgrade Parts List

This upgrade includes the following parts:

- 25-006150 "L" bracket 1 1/2 (2)
- 17-000258 #8 x 3/4" screw
- 48.000766 *Installing Seat Brackets for the Sit-down Booths* (This document)

Installing the Seat Bracket

To install the L brackets to the Festival and Portrait machines, follow these steps:

1. Measure approximately six inches from the end of each side of the booth seat.
2. Use the L bracket as a template and mark the four holes for each bracket.

Caution: Make sure the bracket does not protrude beyond of the lip of the seat or the bracket could cause damage to the customer's clothing or injury the customer.

3. Make pilot holes for each of the marks.
4. Install and tighten the screws into each pilot hole.

Note: If the booth already has two brackets installed, add a third bracket in the middle of the seat.
