Installing Linux and the Color Portrait Studio™ Software

This document describes how to install the Linux operating system and the application software.

Parts List

This media package includes the following:

- Red Hat 6.2 Linux Installation floppy disk
- Red Hat 6.2 Linux Installation CD-ROM
- Color Portrait Studio™ Software CD-ROM
- 48.000768 *Installing Linux and the Color Portrait Studio™ Software* (this document)

Installing the Linux Software

To install Linux and the application software, follow these steps:

1. Insert the Red Hat 6.2 Linux Installation floppy disk into the floppy drive.
2. Insert the Red Hat 6.2 Linux Installation CD-ROM into the CD-ROM drive.
3. Press the power button on the front of the computer to boot the system. The installation takes about 15 minutes to complete.
4. Remove the floppy disk from the drive.
5. Press the **Enter** key to select OK. The system reboots itself.
6. Remove the CD-ROM from the drive.

Installing the Color Portrait Studio™ Software

To install the Color Portrait Studio™ software, follow these steps:

1. Insert the Color Portrait Studio™ Software CD-ROM into the CD-ROM drive.
2. Type **vend** at the username prompt and press the **Enter** key.
3. Type **fotofant** at the password prompt and press the **Enter** key.
4. Type **mkprod** at the system prompt and press the **Enter** key to load the application software. The system takes about three minutes to install the application software and return to the system prompt.
5. Type **reboot** at the system prompt. The system reboots itself and starts the Ad Rotation.
