

## OniX Installation Instructions

1. Place the files in this folder into your Oni installation's folder. They should end up alongside Oni.exe and GameDataFolder.
2. Double-click GameDataConvert.bat. The data conversion should take a few minutes. If you get a message about insufficient privileges or you see an "Access is denied" error, try placing the whole Oni folder somewhere else, like your desktop. Once the conversion is done, you should be able to move Oni back to its original location.
3. Run OniX.exe by double-clicking it or by using the launch script for windowed mode, run\_windX.bat.
4. Enjoy!

Report any problems you encounter in the #general channel on our Oni Discord server: <https://discord.gg/eqDMnkD>
